

## **JBI Methodological Working Groups**

JBI Methodological Working Groups provide ongoing guidance to the JBI Scientific Committee on the development of methodologies of synthesis science, translation science and implementation science to be adopted by the JBI and its international Collaborating Centres and groups. Working groups principally develop methods and specifications for the revision of the Institute's SUMARI software and for new analytical modules, and also complete relevant chapters for the JBI Reviewers Handbook.

Adj. Assoc. Prof. PhDr. Miloslav Klugar, Ph.D. – member of „The synthesis of evidence related to diagnosis (New Analytical Module)“

Adj. Assoc. Prof. Jitka Klugarová, Ph.D. – member of „The synthesis of text and opinion (JBI NOTARI)“
